

WIRING UNIT

Winding out module enables two new conductors: contact and catenary to be installed under the desired tension (adjustable on the machine) facilitating a safe, efficient and defect free installation.

Weight	27000kgs
Gauge	W6a
Rail Type	9A
On / Off Track Cant	100mm
Max Travel Cant	200mm
Max Gradient	1 in 25
ALO Capable	YES
Travel Under Live OLE	NO
Work Under Live OLE	NO

Winding in module for recovery of two conductors: catenary and contact wire under tension in one pass. The conductors are recovered under the required tension (adjustable on the machine) and coiled onto the wiring drums located on the machine. Recovering the conductors in this way ensures safety of all personnel involved and facilitates easy and efficient disposal of old wire.
